We're a proven strategy partner that deliver Brand Strategies which can be driven through the organisation. Our strategy solutions include workshops, research, planning and immersion sessions and all aim to considering the brand entity and build sustainable equity.

Our purpose is to create more time for business owners, and to nurture your opportunities through to success.

Research

The research phase of the branding project is about gathering information and analysing the findings to get to know your business, industry, competitors, target audience and all of your existing branding and design..

Strategy

The brand strategy is based on the findings of the brand research. While the research phase is about exploration, this step is for focusing and consolidating your values, business aspirations and vision for the future.

Design

Without design, you wouldn't be able to deliver the strategy. The design phase is what translates brand values into practical solutions such as a memorable and meaningful visual brand identity. As part of the branding process, design's main role is to formulate the visual identity but it often goes beyond that.

Implementation

The implementation stage is when your new brand identity is revealed to the world. It starts with the careful planning of the roll-out. Implementation can take many forms, from a few business cards to a website or series of product videos. This phase can happen very quickly, but it can also last several months depending on your business' circumstances.

HOW BRAND STRATEGY HELPS YOUR BUSINESS

DEFINED PURPOSE.

People don't just care about product features. They care about aligning themselves with a brand that reflects their values and has a clear purpose. A brand strategy helps you articulate your core identity (aka your purpose, vision, mission, and values) and, most importantly, communicate it.

AN AUDIENCE THAT TRUSTS YOU.

A brand is crafted by people's perceptions of you—specifically, their feelings about you. Having clearly identified values also helps here, but a brand strategy helps you take a comprehensive look at your entire brand ecosystem and identify opportunities to improve the customer experience and strengthen your relationship.

A DIFFERENTIATED BRAND

Why should people choose your brand over others? What makes you different? If you don't have a clear differentiation, they won't. A brand strategy is key to help you articulate this. You must be able to succinctly answer these three questions to build a brand, Who are you? What do you do? Why does it matter?

ENSURES GROWTH

Once you've built your brand, the instinct is to preserve it. While this makes sense, your ultimate goal should be to grow your brand—intentionally and with purpose. This means doing whatever you need to fulfill your brand promise.

HOW BUSINESS STRATEGY HELPS YOUR BUSINESS

ESTABLISHING DIRECTION

A business strategy will first and foremost set the direction for your company. With a clear direction, your business will have something clear to work towards. While it might be your dream to be the biggest supplier of a certain product, a business strategy will set this as a clear target to aim towards.

AVOID COMPETITIVE CONVERGENCE

Companies without a business strategy will often look at their competitors for 'best practice' and this can lead to competitive convergence. It can become impossible to determine between the companies and the market can become diluted. Implement a unique plan that will make you stand out from the crowd instead of just following trends.

MEASURE SUCCESS

Without a business strategy, it can be difficult to measure success because you won't know what you are trying to achieve. A business strategy will set targets that will allow you to measure success by comparing yourself to them. This can help to keep you focused on success and ensure that you are constantly progressing.

INCREASE SATISFACTION

A business strategy can keep your employees focused and driven. A business strategy can set the goals for a company and in doing so ensures that there will be an increased level of satisfaction amongst employees. Retain talent to ensure growth continues!

HOW BRAND CONSISTENCY HELPS YOUR BUSINESS

GENERATES FAMILIARITY.

Brand awareness is name recognition. But being known is not the same as being known for something. In order to be a powerful brand, build brand familiarity: let your customers and potential customers know who you are, what you offer, why you offer this.

PURSUES CUT THROUGH.

The concept in brand marketing titled “cut-through” is achieved via consistency. A brand with a presence stands out and is noticed within a crowded market. Having cut-through is a highly desirable quality for a brand to have, and over time it builds brand equity.

BECOME A COMPETITOR

A brand in competition is a healthy one. It means it's in market, working and communicating. If a brand is not competing it's not doing its job as an autonomous sales agent for the business it's representing.

GENERATES EQUITY AND VALUE

Ensuring a brand is consistent throughout its messaging, creative, positioning and in-market activities will build brand equity fast. And a brand with equity can offer more value to its customers and the business itself.

HOW A MANAGED BRAND HELPS YOUR BUSINESS

SERVICE AND NURTURE INVESTMENTS.

There's far greater ROI in keeping an existing customer than recruiting a new one, and a strong brand idea can optimize your marketing budget. Managing your brand will secure communication channels and strategies, all driven by time and money.

REAFFIRMS BRAND PROMISES.

Your brand works as a glue, binding customers to your brand so they stay with you, grow with you, and tell others about your brand. It helps you identify your best customers and to direct special efforts against them.

ENGAGES THE TEAM

Your brand works as a “North Star” that you're employees follow. As a result, employees feel more engaged, work harder for your brand's success, and become great ambassadors for your brand.

CREATES EFFICIENCY IN MARKETING

A clearly articulated brand with identified assets and parts makes marketing more efficient and effective. Marketing needs to focus on selling brand or products and service. Once this is made clear, the focus can simply be on strategy and performance.
